STRUCTURAL / CIVIL ENGINEER

About the Company

MALOUF ENGINEERING INTERNATIONAL, INC. (MEI) is a consulting structural engineering firm with a national reputation for excellence. MEI is a firm specializing in the analysis, modification and design of telecommunication structures and their foundations, custom antenna mounts on buildings, water tanks, and other structures including camouflaged designs, and facility buildings. Our projects are located throughout the United States and Internationally. Our clients include the largest names in the Wireless telecommunication and Broadcasting industries. Refer to www.maloufengineering.com for more information.

About the Position

We are looking for career-minded Structural Engineers who are well educated, highly motivated, and are eager to join a team of creative thinkers and producers and enjoy a fast-paced environment. This position will provide exposure to a variety of challenges.

Responsibilities will include performing structural analysis and retrofit modification design using specialized Finite Element software and in-house software.

- Candidate needs to be proficient in Finite Element Analysis modeling including latticed structures, and in Steel, Concrete, and Foundation design and must have knowledge of national building and design codes.
- Computer skills required in STAADPro, RISATower, MathCad, AutoCAD, and MS Office.
- Must be able to communicate and present information effectively when preparing reports.
- BSCE or MSCE (preferred) with 2+ years experience – Civil Eng. Degree preferred over Mechanical.
- EIT or PE Preferred.
- Programming capability is preferred (Fortran / Visual Basic).

MEI offers competitive salary, incentive bonus plan, plus benefits package.

Interested candidates can e-mail their resume to hrdept@maloufengineering.com,
